As one of the founding companies in the metal hose industry, UMH has been the #1 choice for strip wound InterLok & SquareLok tubing and custom corrugated hose assemblies since 1942.

Universal Metal Hose is proud to announce the purchase of the instrumentation tubing product line from Plenflex Corporation, Gilbertsville, PA.

This acquisition will allow UMH to offer even a wider variety of small bore SS304 tubing in both InterLok and SquareLok styles. New sizes added to the Universal product portfolio range from 1/16" - 1/2" diameters. UMH has decided to keep the same part numbers and sell this product by the reel, just as Plenflex Corporation has been successfully doing in the past.

Major industries that use small bore/instrumentation tubing are those companies that manufacture measuring and control devices and OEM analytical, medical, control and processing equipment.

Typical applications include crush, rodent, high temperature and high pressure protection/back-up as well as casing for fiber optic and medical instrumentation wire control.

This new product is in stock now and ready to ship!

Don't wait—take the time to give our experienced sales staff a call to find out more about our new series of instrumentation tubing products now!
