**Will Special Cut Lengths Speed Up Your Manufacturing Process?**

As one of the founding companies in the metal hose industry, UMH has been the #1 choice for strip wound inter-locked & square-locked tubing and custom corrugated hose assemblies since 1942.

One of our fastest product growth categories is small diameter (1/16"ID— 1/2"ID) stainless steel floppy hose, cut to specific custom lengths and delivered ready for immediate assembly. OEM customers are buying this product to eliminate the need for secondary manufacturing operations.

UMH will supply up to 150' lengths bundled and boxed any way you would like. In addition to bare metal specific cut lengths, UMH also has the

capability to affix brass caps on one or both ends on selected sizes (see photo on right), cover this square lock or interlocked hose with either PVC or polyurethane (single .030"-.035" thick or double coated) in a variety of colors (single coat black PVC shown on bottom right) and provide with a thin internal wire or string to allow for quick fiber optic or wire/cable insertion. (please see cut length tolerances below)

Please contact our factory or local representative for additional information:

**Don't wait—take the time to give our experienced sales group a call to find out more about our UMH hose products today!**
