UMH New Product Series—Monocoil Flexible Metal Armor!

As one of the founding companies in the metal hose and braid industry, UMH has been the #1 choice for strip wound Inter-Locked & Square-Locked tubing, metal braid and custom corrugated hose assemblies since 1942.

Universal Metal Hose Company is proud to announce the introduction of a new series of products—Monocoil, typically used as protection armor for wires, cables & optical fibers.

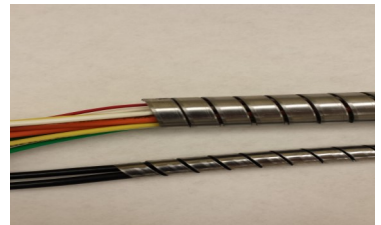

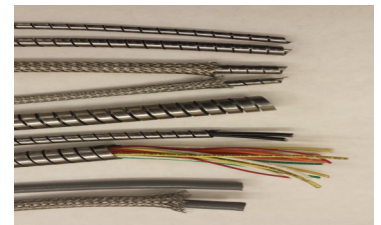

Monocoil is a spiral strip of steel that can either be bare steel or steel, coated with PVC or Polyurethane. The most common use is to bundle wire assemblies, limit light and environmental debris exposure and provide resistance to heat, excessive weight, cutting and fiber kinking. In addition, metal

braid can be applied over bare or coated steel to offer even greater protection from rugged duty conditions and reduce electrical interference.

Applications include medical light guides, Optical fiber, Controller and sensor wires, security systems, robotics, umbilical cables, wire bundling and marine and construction cables and wires.

Our reliable, time proven products are ready to be shipped now to handle your toughest applications!

Why Wait? Call us today to find out more about this armor from our experienced sales professionals—UMH strives to exceed all customer expectations!

THE UMH ADVANTAGE—DID YOU KNOW?

Featured Product:

MONOCOIL — Wire Protection Armor

Available ID sizes range from .185" - .690", product can be ordered as right or left lay and continuous lengths of coil on reels can be up to 20,000ft.
